Dear fraternal colleagues,

The three years spent in an orthodontic residency programme should be most productively utilized and should serve as a platform for upgrading one's degree. Since many migrate abroad after post-graduation to pursue better job opportunities, incorporation of the basics of MOrth into the postgraduate training can be highly beneficial. We, the faculty members of Government Dental College, Thrissur, conceived this idea and are planning to deliver the first programme that integrates MOrth into the MDS curriculum. In addition to focussing on those planning to pursue MOrth after residency, this programme is also designed to provide a comprehensive understanding of the basic changes to be incorporated into orthodontic case planning, scientific reading, and overall thinking process to help one perform better in the MDS examination.
